Adaptability
Customer Service

PROFILE

Full stack web developer with previous experience in high stress environments. Recently earned a certificate in full stack web development from Georgia Institute of Technology. Skills in HTML, CSS, and JavaScript with extreme proficiency under challenging situations, ability to meet deadlines, and ability to work and be efficient with a team. With every project my goal is to fully understand the execution of the code for server software and also create a functional and useful tool for the client software. My past experiences and career have shaped me to be a teamplayer in which I applied aspects of UX and agile development in a recent project where I worked in a team of four to develop a single-page app that allows users a way to search items in their area to pick up or post unwanted items.
